Re: **Blanket Right-of-Way Request**
Franklin Power Products, Inc./Amphenol Corporation
EPA ID # IND 044 587 848
980 Hurricane Road
Franklin, Indiana 46131

Dear Mr. Littleton:

IWM Consulting Group, LLC (IWM Consulting), on behalf of Amphenol Corporation, is working with the United States Environmental Protection Agency (USEPA) with respect to developing an Investigation Work Plan (Work Plan) in the area immediately surrounding the Former Amphenol Facility located at 980 Hurricane Road, Franklin, IN (Site). The Work Plan has not been finalized but the activities may include collection of sewer gas, soil gas, soil, and/or groundwater samples, and the installation of groundwater monitoring wells. In anticipation that some or all of these samples will be obtained offsite in the public right-of-way (ROW), IWM Consulting is seeking approval for a Blanket ROW permit to allow for access and sampling along the ROW of the following public roads: Hurricane Road, Hamilton Avenue, Glendale Drive, Forsythe Street, and Ross Court. IWM Consulting would also like to secure approval for accessing applicable ROWs in the area of the storm sewer located east of Glendale Drive and the sanitary sewer traversing diagonally between Glendale Drive and Forsythe Street. The project area is further outlined in the attached Map (**Attachment A**).

Once the Work Plan has been finalized and the sampling locations have been identified, IWM Consulting will notify the City of Franklin, Department of Public Works regarding the proposed sampling locations, schedule, and confirm that all of the proposed activities are definitively within the limits of the public ROW.

Thank you in advance for considering this request and please do not hesitate to contact me with questions or if you need additional information regarding this submittal.

Sincerely,

IWM CONSULTING GROUP, LLC
